Comparison of the 2 Versions of SDF30A-THC

Comparing with the old SF THC, our new one has 3 main advantages as below:

◆ 1. the Limit signal transferring method upgraded:

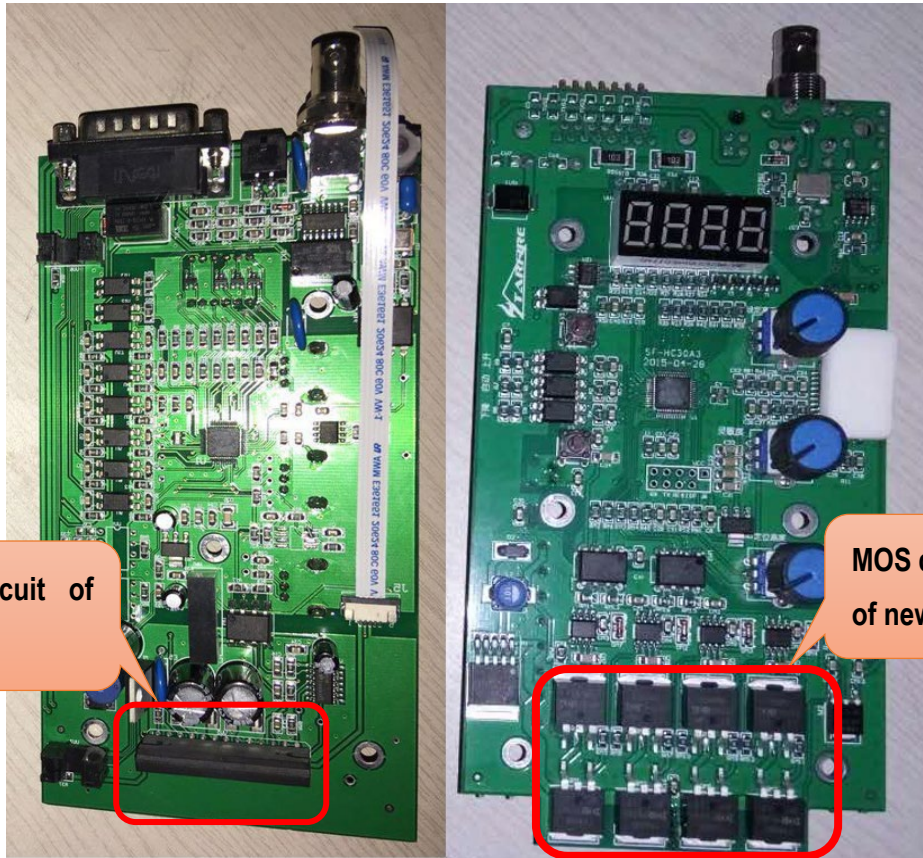

Using optical-electric signal transmission to replace the flex cable transferring, avoid any problem caused by the fault of the flex cable after long time usage.

◆ 2. Drive Module Upgraded:

Using new MOS driving circuit instead of the old electric circuit drive control, achieves bigger and stable current input for the motor of z axis.

Service Support Spirit

◆ 3.Convenience of Lift operating:

Two new buttons added on THC for going up or down.
