How to set the parameters of THC-F1621

➔ Problem : F1621 THC Parameter settings; Parameter standard: L06=0;L07=0;L09=1;

THC only needs three parameters，When using a new THC;

✍ Solution overview：

Step 1: THC Main interface ➝Press【MENU】into THC interface➝Then the parameters in the

parameter display screen will change, and whenever you press 【MENU】 --Then The parameters

are: stop pressing at 〔L01〕, as shown in picture 2; ➝Set the parameters .

NOTE: If you press the 【MENU】 several times, the **parameter display screen** has not found

L01, please refer to the Unlock settings;
