How to upgrade the system interface—IPC100

→ Problem: Upgrade the system interface;

Problem analysis:

✳ 1. Upgrade the system interface;

Solution: Step1: You have a picture which you want it to be the interface.

Set the picture as follows:

1. The image resolution **【image size】** change to 800 * 600.
2. Bitmap **【bmp】** of 32 bits.
3. Format of the picture is JPG.
4. Change the name of the picture is logo.
5. Save the picture into USB.

Step2: Insert the USB in the system → In win desktop Right click on the PowerCut-Select properties → Open File Location → Into PowerCut install location.as show pic2 → Replace the logo file

Restart the software-- Update succeeded.
